www.canardesign.com

Freelance since 2012, I work on business-focused web projects, primarily using Drupal and PHP. I support clients from design through deployment, with recognised expertise in taking over existing applications, redesigns, custom development, API integration and application maintenance. I use AI tools such as Cursor, Claude and OpenAI in my daily workflow to accelerate development, debugging and documentation, while retaining full control over code quality and architectural decisions. I am comfortable working in English within international teams.

Expertise	Technologies	Key Strengths
Drupal 6 to 11 Business back offices Custom modules and entities E-commerce Multisite environments APIs and integrations Shell scripting	PHP, JavaScript, HTML/CSS Drupal, other CMSs, Symfony DDEV, Docker, Git, Drush, Composer ASP.NET, C#, VB.NET MySQL, SQL Server, Oracle Linux, Apache, Microsoft IIS	Big-picture perspective Excellent written communication Autonomous and responsive Multi-project flexibility Ability to take over existing applications Client relations and delivery

MAIN EXPERIENCE

Since 10/2012 | CANARDESIGN - Freelance multi-project designer and developer

- Development of corporate websites, extranets, customer portals, e-commerce sites and custom business applications.
- Full or partial project ownership: scoping, technical design, development, deployment and maintenance.
- Regular work in Drupal environments, complemented by custom PHP, WordPress, PrestaShop, Joomla and .NET as required.

Selected Projects

2026 - OPOPP / OGP Immobilier - Drupal 10

Development of a business platform for real estate professionals: custom modules and entities, tailored back office, dedicated theme and features designed around internal workflows. Azure API integration. Project coordination with another senior developer. Team of 3.

2025-2026 - SCRIB / Council of Europe - PHP

Rewriting a legacy Perl CGI application as a modern PHP 8 MVC application using Twig, PDO/MySQL and Bootstrap 5, within a highly constrained intranet environment. The project required preserving

functional continuity, ensuring interoperability with satellite applications and progressively modernising a business-critical tool while maintaining existing dependencies.

2025 - Soappi / OGP Toulouse - Drupal 10

Development of a training platform: course and session management, e-learning paths, paperless document workflows, e-commerce features, tailored back office and custom theme. Team of 3.

2025 - Securom / Idealcoms Agency - Drupal 10

Upgrade from Drupal 8 to 10. Website enhancements: catalogue and product imports through the client's business web service. Advanced store locator mapping with Mapbox. Delivered independently.

2025 - Master Pro / Idealcoms Agency - Drupal 10

Development of a corporate website connected to the client's REST API: data integration, tailored back office and custom theme. Team of 2.

2024 - COFAQ Group / Idealcoms Agency - Drupal 10

Development of a corporate website connected to the client's REST API, with a dedicated back office for managing content and business data. Team of 4.

2024 - OpenAssur / SN Logica - Drupal 7 to Drupal 10 migration

Took over an existing Drupal 7 project and migrated it to Drupal 10, including functional and technical redesign, content adaptation, feature migration and architectural evolution. Delivered independently.

2024 - mariage-location.fr - Drupal 11

Development and ongoing enhancement of a Drupal 11 business platform, with features tailored to the platform's specific use cases. Project managed in collaboration with a graphic designer / SEO consultant.

2023 - Siblu / Theta Agency - Drupal 9

Development of a customer portal: booking management, online payments and integration with the Maxxton and Cognito APIs. Team of 5.

2023 - metal-interface.fr - Drupal 9

Redesign and enhancement of a multilingual, multi-domain business directory, including adaptation of the existing architecture and features. Delivered independently.

2023 - JLPT Easy - Drupal 9

Took over and enhanced an online learning platform, including improvements to existing features and application maintenance. Delivered independently.

2022-2023 - PHARMAT / EnJanvier Agency - Drupal 9

Development of an ordering website for pharmacists: custom e-commerce features, integration with a proprietary API connected to SAP and adaptation to business processes. Team of 4.

2021 - Mon Petit Paquet - PrestaShop

Took over and redesigned an e-commerce site selling reusable nappies: completed the online store, added new features and improved the purchasing journey. Delivered independently.

2019-2021 - Indigo Agency - WordPress

Took over and redesigned several WordPress sites as lead developer, including custom features for live events, real-time announcements and business referral systems. Team of 3.

2020 - Cybelle Planète - Joomla

Took over and maintained the organisation's three websites: technical updates, bug fixes, functional enhancements and new features. Delivered independently.

2018-2023 - Pyxis - Drupal 7 to Drupal 9

Development and enhancement of several business platforms: vehicle lease transfer listings, used vehicle sales and automotive auction platforms. Implementation of e-commerce features, tailored back offices, multi-role access management and complex end-to-end transactional workflows.

Migration of all three sites to a shared Drupal architecture.

Overall project management, including technical supervision, training and mentoring junior developers.

Since 2011 - Xerox France / enterprise clients - ASP.NET, C#, SQL Server, IIS deployments

Development of intranets, extranets and business applications for enterprise clients including Air France, Groupama, the Council of Europe, Apave, OECD, Pôle Emploi and SACD. Team of 2 developers.

PREVIOUS EXPERIENCE

10/2012-05/2013 | EDOKIAL, France - C# / ASP.NET Developer

Development of applications and portals for document production tracking, workflow processing and document viewing.

06/2012-10/2012 | CAPGEMINI, France - Drupal Developer

Development of a bespoke enterprise social network using Drupal 6 / Drupal Commons, in an Agile environment, with deployment on Acquia Cloud.

06/2011-10/2011 | GREENSPRING TRAINING, United Kingdom - WinForms Developer

Design and development of a staff management application, from requirements analysis through production deployment.
